Dear Mr. Brady,

We are in receipt of your letter dated October 31, 1977. Actual material delivered to our Newark facility on August 16, 1977.was 7 (55 gal) drums of Ethyl Oxide and 21 (41 gal) drums of Spent Phenol Catalyst. You listed them, in error, as Ethyl Acrylate.

All materials are brought to our site in <u>Carlstadt</u>, <u>New Jersey</u> where they are blended with like materials, recovered where possible, and if not, incinerated. Incineration is accomplished in scrubbed rotary kilns, at approximately 3000°F with full intent on BTU utilization.

Every phase of our operation is accomplished within the framework of existing Federal, State and Local regulations, and conducted under the following permits issued by the New Jersey State Department of Environmental Protection:

Permit #3326-Issued for transporting chemical and industrial waste.

Permit # 0205A-Issued for operating a facility for the treatment, processing or recovering of chemical wastes and/or by-products.

Very truly yours

Herbert G. Case. Jr.
